SUMMARY OF ARGUMENT

2 This Court should dismiss Plaintiff craigslist, Inc.’s Computer Fraud and Abuse Act, 18
3 U.S.C. § 1030, and California Comprehensive Computer Access and Fraud Act, Cal. Penal Code
4 § 502, claims alleged in the First Amended Complaint. By definition, an Internet user who
5 accesses public data on a publicly available website *ipso facto* has authorized access to view the
6 website. *See Pulte Homes, Inc. v. Laborers’ Int’l Union of N. Am.*, 648 F.3d 295, 304 (6th Cir.
7 2011). By making its user-generated classified ads publicly available on its public website,
8 craigslist has authorized anyone to access the public information. craigslist’s interpretation of the
9 CFAA empowers private persons or entities to criminalize another’s access to public data on a
10 public website—precisely contrary to the principles the Ninth Circuit articulated in *United States v.*
11 *Nosal*, 676 F.3d 854 (9th Cir. 2012).

12 Even if this Court finds that Defendant 3taps' and craigslist's interpretation of the CFAA
13 are both at the very least plausible, making the definition of "without authorization" ambiguous in
14 the specific factual situation at hand, this Court should adopt 3taps' interpretation because: (i) of
15 the rule of lenity; (ii) legislative history confirms that Congress never intended to restrict access to
16 publicly available websites; (iii) 3taps' interpretation avoids constitutional vagueness concerns; and
17 (iv) craigslist's attempt to create a permission-based "public" website is against public policy.

1 In support of its motion to dismiss the claims of Plaintiff craigslist, Inc. (“craigslist”) in its
2 First Amended Complaint (“FAC”) alleging violations of the Computer Fraud and Abuse Act
3 (“CFAA”), 18 U.S.C. § 1030, and California’s counterpart, the Comprehensive Computer Access
4 and Fraud Act, Cal. Penal Code section 502 (“§ 502”), Defendant 3taps, Inc. (“3taps”) submits this
5 supplemental brief regarding whether liability under those statutory provisions may be imposed for
6 accessing a publicly available website to view publicly available information.¹

PRELIMINARY STATEMENT

8 Each month, more than sixty million Americans visit craigslist's website (craigslist.org) to
9 view hundreds of millions of classified postings, which makes craigslist.org the world's largest
10 online forum for local classified advertising and community discussions. (FAC ¶¶ 1, 24-25.) In
11 terms of "web traffic," craigslist.org is the most viewed website in the United States behind
12 Facebook and Google, with billions of webpage views annually. (*Id.* ¶ 25.)

To view the public information on craigslist.org, *no* passwords or other security clearance is needed, thereby making it a “publicly available website.”² Yet, notwithstanding that the public exchange information on its website is readily accessible to the public, craigslist alleges that 3taps did not have “permission” to access such information and therefore violated the CFAA and § 502, both of which provide for civil and criminal remedies. Specifically, craigslist alleges that 3taps has violated these statutes because 3taps: (i) ignored a cease-and-desist letter stating that 3taps is “no longer authorized to access, and [is] prohibited from accessing craigslist’s website” for any reason;³ and (ii) used different Internet Protocol (“IP”) addresses, and then “anonymous proxies,”

²³ ¹ craigslist did not assert CFAA and § 502 claims against Defendant Discover Home Network, Inc.,
²⁴ d/b/a Lovely. (*Compare* FAC ¶¶ 212-29 (stating that the CFAA and § 502 claims are “as to
²⁵ Defendants 3Taps and Niessen”), *with id.* ¶¶ 208-11 (stating that the California Unfair Competition
Claim is “as to all Defendants.”).)

²⁶ See www.craigslist.org (allowing any person with an Internet connection to freely access the site); (Order Granting in Part and Denying in Part Mots. to Dismiss at 7 & n.8 (N.D. Cal. Apr. 30, 2013, Dkt. 74) [hereinafter “Apr. 30 Order”]).

²⁷ ¶³ (Dkt. 60, Ex. A. to Dec. of Christopher Kao, at 2; *see also* FAC ¶ 132.)

1 to avoid craigslist's attempts to deny 3taps' access to craigslist.org.⁴ (FAC ¶¶ 82-84.) craigslist
 2 seeks to bar 3taps from viewing craigslist.org to prevent 3taps from "scraping" (i.e., electronically
 3 copying) the user-generated ads posted on the site. (*See id.* ¶ 77.)⁵

4 As described below, both as a matter of law and policy, the CFAA does not create a
 5 permission-based regime for access to the public data on publicly viewable portions of websites.
 6 The courts that have addressed the issue confirm that an unprotected website—e.g., one not
 7 requiring a password or code-based restriction to access private or confidential information—by
 8 definition grants access to the entire world. The courts implicitly recognize that—irrespective of
 9 whether a website owner has attempted to "restrict" a particular user's access to the website—it
 10 would make no sense to hold that user civilly or criminally liable under the CFAA for accessing
 11 the publicly available content on the website. After all, the website owner permits that very access.

12 Here, craigslist asks this Court to adopt an approach to the CFAA that Congress never
 13 contemplated and that courts have rejected, in an attempt to foster a permission-based Internet *for*
 14 *public websites*. In such a world, owners of public websites can arbitrarily determine *who* can view
 15 publicly available information rather than merely prevent access to private or confidential
 16 information on a protected website. Whether such privately enforced "de-authorizing" from public
 17 websites is directed at competitors, journalists (as in this Court's example (*see* Apr. 30 Order at 8
 18 n.8)), or just those with different points of view, any interpretation of the CFAA that empowers
 19 private persons or entities to criminalize another's access to public data on a public website is
 20 precisely contrary to the principles the Ninth Circuit articulated in *United States v. Nosal*, 676 F.3d
 21 854 (9th Cir. 2012). Accordingly, this Court should dismiss craigslist's CFAA and § 502 claims.

22 Even if the Court finds that 3taps' and craigslist's interpretations of the CFAA are both at
 23

24 ⁴ Craigslist also argued that 3taps violated the CFAA and § 502 because it accessed craigslist.org in
 25 violation of craigslist's terms of use. This Court rejected that argument. (*See* Apr. 30 Order at 5-
 26 7.)

27 ⁵ Notably, prior to August 2012, 3taps obtained user-generated posts on craigslist via caches
 28 maintained by Google, a general purpose website. As alleged in 3taps' counterclaim for violations
 of the federal antitrust laws, craigslist has caused that content to be unavailable for scraping.
 (3taps' First Amended Counterclaim ¶¶ 137-46 (Dec. 21, 2012, Dkt. 47).)

1 the very least plausible, making “without authorization” ambiguous in the specific factual situation
 2 at hand, this Court should adopt 3taps’ interpretation because: (i) of the rule of lenity; (ii)
 3 legislative history confirms that Congress never intended to restrict access to publicly available
 4 websites; (iii) 3taps’ interpretation avoids constitutional vagueness concerns; and (iv) craigslist’s
 5 attempt to create a permission-based “public” website is against public policy.

6 **ARGUMENT**

7 **I. Settled Law Confirms That the CFAA Does Not Apply to Public Websites**

8 **A. Courts Have Rejected the CFAA’s Application to Public Websites**

9 As relevant here, the CFAA imposes criminal and/or civil liability on “whoever . . .
 10 intentionally *accesses a computer without authorization* or exceeds authorized access, and thereby
 11 obtains . . . information from any protected computer.” 18 U.S.C. § 1030(a)(2)(c) (emphasis
 12 added), (b) (providing for criminal liability), (g) (providing a civil remedy). Congress did not
 13 define “without authorization” and therefore the Ninth Circuit has given the term its ““ordinary,
 14 contemporary, common meaning.”” *LVRC Holdings LLC v. Brekka*, 581 F.3d 1127, 1132-33 (9th
 15 Cir. 2009) (citation omitted); *see also United States v. Morris*, 928 F.2d 504, 511 (2d Cir. 1991).

16 Specifically, the Ninth Circuit has defined “[a]uthorization . . . as ‘permission or power
 17 granted by an authority.’” *Brekka*, 581 F.3d at 1133 (holding that “a person who uses a computer
 18 ‘without authorization’ has *no rights, limited or otherwise*, to access the computer in question”) (emphasis
 19 added) (citing *Random House Unabridged Dictionary* 139 (2001); *Webster’s Third
 20 International Dictionary* 146 (2002) (further defining authorization as “the state of being
 21 authorized” and “authorize” as “to endorse, empower, justify, permit by or as if by some
 22 recognized or proper authority”). The issue, then, is whether by making the classified ads on its
 23 website publicly available, craigslist has “authorized” the world, including 3taps, to access
 24 craigslist.org.

25 A person who views publicly available information on a publicly available website is no
 26 more a criminal under the CFAA than a person “viewing a shop window from a public street.” *See*
 27 *Orin S. Kerr, Cybercrime’s Scope: Interpreting “Access” and “Authorization” in Computer*

1 *Misuse Statutes*, 78 N.Y.U. L. Rev. 1596, 1620 (2003). craigslist has determined that, because it is
 2 a public website providing for the exchange of goods and services, it must keep its window
 3 “curtains” open for the public to have access to its public exchange space—without any password
 4 or code-based restriction meant to screen users not entitled to private or confidential information.
 5 In the parlance of the CFAA, craigslist has given everyone “permission” to access its information
 6 simply by virtue of making the user-generated classified ads openly available on craigslist.org.

7 Case law confirms this. For example, in *Pulte Homes, Inc. v. Laborer’s International*
 8 *Union of North America*, 648 F.3d 295 (6th Cir. 2011), the Sixth Circuit held that a home builder,
 9 Pulte, had not sufficiently pled an “access without authorization” claim under the CFAA where the
 10 defendant union’s members bombarded Pulte with calls and emails, clogging its phone lines and
 11 overloading Pulte’s servers and email system. *Id.* at 299. Pulte’s general counsel sent a cease-and-
 12 desist letter to the union demanding that it stop encouraging members to contact Pulte and its
 13 officers. *Id.* The calls and e-mails continued and Pulte filed suit. *Id.*

14 The Sixth Circuit adopted *Brekka*’s definition of “without authorization” to mean a person
 15 who “uses [the] computer [that] . . . has no rights, limited or otherwise, to access the computer in
 16 question.” *Id.* at 304 (quoting *Brekka*, 591 F.3d at 1133 (emphasis added)). It then held that the
 17 union members had the right to call and email Pulte’s offices and personnel because “[the union]
 18 used unprotected public communication systems.” *Id.* That fact alone—the use of a public
 19 communications systems—meant that Pulte’s allegations failed because “*like an unprotected*
 20 *website*, Pulte’s phone and e-mail systems [were] open to the public, so [the union] was authorized
 21 to use [them].” *Id.* (internal quotations, original alterations and citations omitted). The court
 22 reasoned that because no password or code was necessary to email or call Pulte, the union
 23 members did not access Pulte’s computers “without authorization.” *See id.*

24 *Pulte Homes* is dispositive here. Just as the union members accessed the home builder’s
 25 computers through unprotected public communications systems, 3taps accessed an unprotected
 26 public website and obtained information available to anyone with Internet access. And, just as
 27 Pulte’s cease-and-desist letter did not further its “without authorization” claim, the cease-and-desist
 28

1 letter craigslist sent to 3taps *cannot* change the fact that craigslist.org was and remains publicly
 2 available to anyone with Internet access.

3 Other district courts also have dismissed CFAA claims against defendants that accessed and
 4 used publicly available information on a website, in apparent violation of the website's terms of
 5 use. *See Cvent, Inc. v. Eventbrite, Inc.*, 739 F. Supp. 2d 927, 933-34 (E.D. Va. 2010); *Koch Indus.,*
 6 *Inc. v. Does*, No. 2:10CV1275DAK, 2011 WL 1775765, at *8-9 (D. Utah May 9, 2011). For
 7 example, in *Cvent*, the court dismissed a CFAA claim where a publicly available website owner
 8 alleged that a competitor hired a third party to “scrape” data from its website. 739 F. Supp. 2d at
 9 930. The website owner argued, similar to craigslist here, that because its terms of use prohibited
 10 competitors from *accessing* its website or information, the competitor’s access was “without
 11 authorization.” *Id.* at 932. The court rejected that argument, holding that the scraping did not
 12 constitute hacking under the CFAA because the information was on a publicly available website,
 13 and therefore the “scraper” had authorized access to it. *Id.* at 933. The court explained that
 14 because “anyone, including competitors . . . may access and search information [on the website] at
 15 will,” and because the website owner did not meaningfully protect its information through
 16 password protection, for example, the competitor was not “without authorization” and could scrape
 17 data from the site without violating the CFAA. *Id.* at 932-34.

18 Similarly, in *Koch Industries*, the court dismissed a CFAA claim alleging that a climate
 19 change group engaged in “unauthorized access” of a public website. 2011 WL 1775765, at *9.
 20 The group created a website with content similar to that on the plaintiff’s site, as well as a link to
 21 the actual website. *Id.* at *1. The court held, in part, that alleging unwarranted use of publicly
 22 available information was insufficient to state a claim under the CFAA where the website owner
 23 required no “individualized grant of access,” such as a login or password for that information. *Id.*
 24 at *8 (quoting *Cvent*, 739 F. Supp. 2d at 932). The court further noted that adopting the website
 25 owner’s theory of liability—that is, any use of its website’s content of which [the owner did] not
 26 approve” in its terms of use or otherwise—“could expose a political critic to criminal prosecution,”
 27 which would be a result “clearly beyond Congress’ intent in passing the CFAA.” *Id.* at *9; *see also*
 28

1 *Loud Records LLC v. Minervini*, 621 F. Supp. 2d 672, 678 (W.D. Wis. 2009) (“[B]ecause the files
 2 that plaintiffs allegedly accessed were accessible by the public, any allegation that the computer
 3 should be considered protected or that plaintiffs acted without authorization is tenuous at best.”).

4 These cases confirm that by making its user-generated classified ads publicly available on
 5 its website, craigslist has authorized anyone to access them even though it has purported to
 6 selectively “de-authorize” access. This Court should follow these decisions and hold that, by
 7 definition, an Internet user who accesses a publicly available website with no password or code-
 8 based restrictions *ipso facto* has authorized access to view the website.

9 **B. The Principles Outlined in *Nosal* Dictate That Public Data on Publicly
 10 Available Websites Are Beyond the Scope of the CFAA**

11 The underlying logic of the Ninth Circuit’s analysis in *Nosal* strongly suggests that the
 12 CFAA does not apply to public data on public websites.⁶

13 First, the Ninth Circuit rejected the government’s interpretation of the CFAA because it
 14 “would transform the CFAA from an anti-hacking statute into an expansive misappropriation
 15 statute.” *Nosal*, 676 F.3d at 857. The court explained that the CFAA was intended to target
 16 computer hacking and “[i]f Congress meant to expand the scope of criminal liability to everyone
 17 who uses a computer in violation of computer use restrictions – which may well include everyone
 18 who uses a computer – we would expect it to use language better suited to that purpose.” *Id.*

19 Second, in cautioning against broadly interpreting the CFAA, the court held that “[b]asing
 20 criminal liability on violations of private computer use policies can transform whole categories of
 21 otherwise innocuous behavior into federal crimes simply because a computer is involved.” *Id.* at
 22 860. In fact, a broad interpretation is more dangerous in the CFAA context because a website
 23 owner retains the right to change its terms at any time without notice.⁷ *Id.* at 862.

24

⁶ This Court noted that *Nosal* “did not seize on th[e] opportunity to highlight a possible distinction
 25 between public and non-public information.” (Apr. 30 Order at 8 n.8.) But the *Nosal* Court did not
 26 have that opportunity because the defendant was accused of accessing confidential, proprietary
 27 information. See *Nosal*, 676 F.3d at 856.

28 ⁷ Lest one think this is a hypothetical proposition, here, craigslist relied on a change in its Terms of
 29 Use to claim that it is the exclusive licensee of all its users’ posts. (Apr. 30 Order at 11-12.)

1 craigslist's attempt to impose CFAA liability on 3taps raises these same concerns.
 2 craigslist's interpretation would subject any and all Internet users to potential criminal liability for
 3 merely receiving data transmitted over the Internet when it violates privately created access
 4 restrictions. *See id.* at 861 (expressing concern that access to public information could be
 5 criminalized by a company). Under the CFAA, no substantive distinction exists between a public
 6 website owner selectively restricting access to a site completely and restricting use of a site for a
 7 certain purpose.⁸

8 **C. craigslist's Attempt to Revoke 3taps' Access Is a Use Prohibition**
 9 **Masquerading as an Access Ban**

10 *Nosal* noted that appropriate interpretations of the CFAA "maintain [the CFAA's] focus on
 11 hacking rather than turning it into a sweeping Internet-policing mandate." 676 F.3d at 858. The
 12 court therefore held that "the CFAA does not extend to violations of use restrictions." *Id.* at 863.

13 Because craigslist.org is a public website, craigslist, by definition, cannot be concerned
 14 with mere access to its site; in fact, its business model requires such access to make its public
 15 exchange space successful. Faced with the dilemma of having a public website that allows users to
 16 exchange goods and services, but wanting to restrict "access" to certain users, craigslist does the
 17 predictable: attempt to block those whose *use* it finds objectionable under the guise of denying
 18 "access." "But simply denominating limitations as 'access restrictions' does not convert what is
 19 otherwise a use policy into an access restriction." *Wentworth-Douglass Hosp. v. Young & Novis*
 20 *Prof'l Ass'n*, No. 10-cv-120-SM, 2012 WL 2522963, at *4 (D.N.H. June 29, 2012).

21 ⁸ Indeed, such distinctions lead to arbitrary and absurd results. For example, as this Court noted, a
 22 news outlet could merely send letters purporting to restrict access by any other news outlet's
 23 employees and block their IP addresses. If an employee of a competitor were to view the news
 24 outlet's website, he could face criminal liability under craigslist's interpretation. (*See* Apr. 30
 25 Order at 8 n.8.) Similarly, the Democratic National Committee could send an email restricting
 26 access by every registered Republican. If a registered Republican visited
 27 <http://www.democrats.org>, he could face criminal liability under craigslist's interpretation. *See*
 28 *Koch Indus.*, 2011 WL 1775765, at *9. Lastly, if someone received an email from a friend that a
 new website, www.dontvisitme.com, has some beautiful pictures posted, but the website's
 homepage clearly and unambiguously states that no one is allowed to click on the links to view the
 pictures, that person could face criminal liability for viewing the pictures. *See* Orin S. Kerr,
Investigating and Prosecuting 21st Century Cyber Threats, United States House of Representatives
 Subcommittee on Crime, Terrorism, Homeland Security and Investigations (Mar. 13, 2013).

1 Here, craigslist is only blocking 3taps, its competitor, because of the way 3taps intends to
 2 *use* information, which *Nosal* held is not a violation of the CFAA. (See, e.g., FAC ¶¶ 1-8.) Indeed,
 3 *Nosal*'s distinction between "use" and "access" restrictions would be superfluous if craigslist could
 4 blacklist those engaging in a use it finds objectionable by not allowing "access" to its public site.

5 **II. At Minimum, the Phrase "Without Authorization" Is Ambiguous As Applied to a**
Publicly Available Website, And Must Be Interpreted Narrowly

7 At the least, 3taps' interpretation of access "without authorization" is plausible. In the same
 8 way that the Ninth Circuit found the definition of "exceeds authorized access" ambiguous, *see*
 9 *Nosal*, 676 F.3d at 856-57, as applied here, "access[] . . . without authorization" is likewise
 10 ambiguous. *See EF Cultural Travel BV v. Explorica, Inc.*, 274 F.3d 577, 582 n.10 (1st Cir. 2001)
 11 (meaning of "without authorization" "proven to be elusive"), *superseded by statute on other*
 12 *grounds as recognized in Cenveo Corp. v. CelumSolutions Software GMBH & Co KG*, 504 F.
 13 Supp. 2d 574, 581 n.6 (D. Minn. 2007).⁹

14 Here, accessing craigslist.org "without authorization" could be interpreted in at least two
 15 ways. *First*, as 3taps contends, it had authorization to access craigslist.org because, by making
 16 available public data on a publicly available website, craigslist gave access to everyone and has no
 17 authority to selectively choose who looks at its website. *Second*, under craigslist's interpretation, it
 18 has the authority to single out users and prohibit access to public portions of its site. Under these
 19 facts, if the Court determines that both interpretations of the CFAA are at the very least plausible,
 20 the definition of "without authorization" would therefore be ambiguous.

21
 22
 23
 24 ⁹ *See also Kerr*, 78 N.Y.U. L. Rev. at 1623-24 ("[W]ho and what determines whether access is
 25 authorized, and under what circumstances? Can a computer owner set the scope of authorization
 26 by contractual language? Or do these standards derive from the social norms of Internet users?
 27 The statute[] [is] silent on these questions. . . ."). Indeed, courts define the term "without
 28 authorization . . . based upon analogizing the concept . . . as to computers to a more familiar and
 mundane predicate presented in or suggested by the specific factual situation at hand." *United
 States v. Drew*, 259 F.R.D. 449, 460 (C.D. Cal. 2009).

1 **A. The Rule of Lenity Requires Adoption of 3taps' Interpretation of "Without**
 2 **Authorization"**

3 "The rule of lenity requires penal laws [like the CFAA] to be construed strictly." *Nosal*,
 4 676 F.3d at 863 (internal quotation marks and citations omitted). "[W]hen [a] choice has to be
 5 made between two readings of what conduct Congress has made a crime, it is appropriate, before
 6 [the Court] choose[s] the harsher alternative, to require that Congress should have spoken in
 7 language that is clear and definite." *Id.* (first alteration in original) (quoting *Jones v. United*
 8 *States*, 529 U.S. 848, 858 (2000)). "If there is any doubt about whether Congress intended [the
 9 CFAA] to prohibit the conduct in which [defendant] engaged, then [the court] must choose the
 10 interpretation least likely to impose penalties unintended by Congress." *Id.* (first alteration in
 11 original) (internal quotation marks and citation omitted).

12 As the "unauthorized access" language in the CFAA is currently drafted, Internet users,
 13 including the sixty million monthly craigslist.org users, do not have fair notice that Congress
 14 intended to criminalize viewing a public website in the event the website's owner instructs a person
 15 not to view it. This is because the plain language of the CFAA does not clearly create liability in
 16 such a circumstance. *See id.* Therefore, to avoid sweeping liability, the rule of lenity requires the
 17 Court to interpret the CFAA to mean that Internet users always have "authorized access" to public
 18 information on a publicly available website. *See id.* at 862-63.

19 **B. Congress Did Not Intend for the CFAA to Apply to Public Information on**
 20 **Publicly Available Websites**

21 The CFAA's lengthy legislative history confirms that Congress was interested in protecting
 22 *private* and *confidential* information, not public information on publicly available websites.
 23 Recognizing the explosion of computer use and its implications for the public, private,
 24 governmental, and personal sectors, Congress believed computers "brought a great many
 25 benefits . . . to all of our lives," but also posed a great risk to our privacy and confidentiality. S.
 26 Rep. No. 99-432, at 1-2 (1986); *see also* H.R. Rep. No. 98-894, at 10 (1984). In passing the first
 27 iteration of the CFAA in 1984, Congress noted that the potential for privacy abuse by a specific
 28

1 subset of computer users—“hackers”—threatened the viability of computer systems in daily life.
 2 H.R. Rep. No. 98-894, at 10.

3 Thereafter, the CFAA has grown in scope, but not in its purpose to subvert unauthorized
 4 activity breaching *privacy* and *confidentiality* that results in harms such as damaged information or
 5 the transmission of viruses. *See* H.R. Rep. No. 98-894, at 9 (realizing that “criminals possess the
 6 capability to access and control high technology processes vital to our everyday lives which has
 7 spurred the recent alarm over computer-related crime”); 142 Cong. Rec. S10,889, 10,890 (1996)
 8 (“The . . . Act would close these loopholes[,] outside hackers . . . and malicious insiders face
 9 criminal liability for intentionally damaging a computer.”). Glaringly absent from this legislative
 10 history is any indication that the CFAA was meant to apply to one’s access to public data on
 11 publicly available websites.

12 Indeed, when a website is publicly accessible—and especially when the information at
 13 issue is otherwise publicly available—then privacy and confidentiality concerns are not at issue,
 14 and the CFAA is not applicable. Congress has compared violations of the CFAA to the physical
 15 crime of ““breaking and entering.”” H.R. Rep. No. 98-894, at 12. But Congress never suggested
 16 that the CFAA should apply to Internet users (or publicly available information) because public
 17 data on public websites, by nature of being public, require no access authorization, or ““breaking
 18 and entering.”” *See* S. Rep. No. 99-432, at 9 (“the offender obtains . . . information as to how to
 19 break into that computer system”); S. Rep. No. 104-357, at 9 (1996) (explaining that insiders who
 20 are authorized to access a computer face criminal liability only for intentionally inflicted damage
 21 whereas outside hackers may be punished for causing damage).

22 Expanding the CFAA to apply to the public information on public websites flies in the face
 23 of its legislative history. The statute essentially would then apply to all forms of information and
 24 every website and make the CFAA limitless in scope and application. The legislative history
 25 warns against this interpretation. When Congress amended the CFAA in 1996, Senator Leahy
 26 specifically articulated that the statute’s premise “is privacy protection.” 142 Cong. Rec. S10,889.
 27 And this premise has been reiterated time and again. *See* S. Rep. No. 104-357, at 7 (“[T]he
 28

1 premise of this subsection is privacy protection.”) (citation omitted).¹⁰

2 When congressional intent is lacking, the CFAA should not be applied to curtail the very
 3 benefits that it was enacted to protect. *See Nosal*, 676 F.3d at 858 n.5. In passing the CFAA,
 4 Congress sought to protect the many benefits that computer systems offer to our lives. S. Rep. No.
 5 99-432, at 2. One such benefit is the vast amount of publicly available data on public websites that
 6 allow users to innovate and create new technologies and ideas. Absent from the CFAA’s
 7 legislative history is any indication that the statute should apply to the dissemination of public
 8 information on a publicly available website.

9 **C. To Avoid Constitutional Infirmity, This Court Must Adopt 3taps’
 10 Interpretation of “Without Authorization”**

11 Assuming that craigslist’s and 3taps’ interpretations of the CFAA in the context of public
 12 data on publicly available websites are both “fairly possible,” this Court must choose the
 13 interpretation that does not “raise serious constitutional problems.” *See INS v. St. Cyr.*, 533 U.S.
 14 289, 299-300 (2001). Here, that requires the Court to choose 3taps’ interpretation because
 15 applying the CFAA to persons who access publicly available websites would render the CFAA
 16 unconstitutionally vague, in violation of a criminal defendant’s due process rights.

17 As the Ninth Circuit recognized, the CFAA must be interpreted consistently in the criminal
 18 and civil contexts, which necessarily requires this Court to interpret the CFAA in a way that does
 19 not run afoul of a criminal defendant’s due process rights. *See Brekka*, 581 F.3d at 1134. To
 20 ensure that the CFAA does not raise due process concerns, it must be interpreted: (1) to “provide
 21 the kind of notice that will enable ordinary people to understand what conduct it prohibits” and (2)
 22 so that it does not authorize or “even encourage arbitrary and discriminatory enforcement.” *City of*
 23 *Chicago v. Morales*, 527 U.S. 41, 56 (1999) (citation omitted).

24 If the CFAA were interpreted to apply to persons obtaining information from publicly
 25

26 ¹⁰ *See also* S. Rep. No. 99-432, at 6 (“The premise . . . will remain the protection, for privacy
 27 reasons, of computerized credit records and computerized information.”); 142 Cong. Rec. S10,889
 (“This legislation will help safeguard the privacy . . . of our national computer systems and
 networks.”).

1 available websites, the phrase “without authorization” would be so vague and sweeping that it
 2 would not provide an ordinary person with sufficient notice as to what conduct is prohibited. As an
 3 initial matter, an ordinary Internet user would not understand what “without authorization” means
 4 in the context of a public website that does not require a password or impose a code-based
 5 restriction to protect private or confidential information. In fact, an ordinary person would not
 6 understand that he could be “without authorization,” and thus engaging in criminal conduct, should
 7 a website merely load in his or her Internet browser—as a publicly available website would—upon
 8 the person entering a URL or clicking on a hyperlink. That an owner of a publicly available
 9 website tells a specific person or set of persons not to view the website, whether through a cease-
 10 and-desist letter or otherwise, does not bring any clarity to the phrase “without authorization.” The
 11 problem is that notwithstanding the website owner’s pronouncements, the user still can access the
 12 public data on the site. Indeed, but for the website owner transmitting the website’s public
 13 information to the person’s computer (i.e., granting authorization), the person would be unable to
 14 view the information. (See discussion *infra* p.13 n.12.)

15 Similarly, in blocking a person’s IP address, a website owner is not “de-authorizing”
 16 access. Rather, the website owner has merely blocked access from a specific IP address.¹¹
 17 Because the site remains available for that person to view from another computer or location with a
 18 different IP address, an ordinary person would not understand a blocked IP address to mean that he
 19 *personally* is “without authorization.”

20 Thus, to save the CFAA from potential constitutional infirmities, the Court should interpret
 21 the phrase “without authorization” as not applying to the accessing of publicly available websites.
 22 An interpretation of the CFAA that empowers private entities to criminalize access to public data
 23 on a public website is precisely contrary to the principles articulated in *Nosal* and could create
 24 federal criminal liability for untold scores of unsuspecting Internet users. *See* 676 F.3d at 860.

25
 26 _____
 27 ¹¹ Internet users innocuously use multiple IP addresses for different devices and while connecting
 28 to different wireless networks. There is nothing improper or unlawful about switching IP addresses
 and thereby avoiding IP address blocking.

1 **D. craigslist's Attempt to Create a Permission-Based "Public" Website Under the**
 2 **CFAA Raises Serious Policy Concerns**

3 Policy considerations weigh heavily in favor of following those courts that have rejected
 4 the CFAA's application to public websites and adopting 3taps' interpretation of the CFAA. Since
 5 its inception, the Internet "has been premised on a culture of openness—*where access has been*
 6 *presumed to be the de facto rule*, with individual actors being given the choice of 'opting out' by
 7 *adopting bright-line* exclusionary techniques (such as encryption, passwords, authentication
 8 techniques and the like)." Shyamkrishna Balganesh, *Common Law Property Metaphors on the*
 9 *Internet: The Real Problem with the Doctrine of Cybertrespass*, 12 Mich. Telecomm. & Tech. L.
 10 Rev. 265, 289-90 (2006) (emphasis added).

11 craigslist, however, would have this Court interpret the CFAA in a way that would render
 12 public information on public websites subject to selective private censorship based on *who* can and
 13 cannot access such information. In effect, craigslist seeks a CFAA that no longer is aimed at
 14 protecting against "hackers" but rather would enable website owners to criminalize viewing public
 15 information on public websites by anyone they decide to blacklist. But a legal standard that invites
 16 owners of public websites to selectively criminalize the behavior of potentially anyone who uses a
 17 computer is precisely what *Nosal* warned against. *See Nosal*, 676 F.3d at 859, 860-61 (A "broad
 18 construction of the CFAA" would affect "everyone . . . who uses a computer, smart-phone, iPad,
 19 Kindle, Nook, X-box, Blu-Ray player or any other Internet-enabled device" and potentially
 20 "millions of unsuspecting individuals would find that they are engaging in criminal conduct.").

21 Like public websites, a store window is either open or shut—there is no in between.
 22 craigslist, by choice, keeps the curtains to its storefront open at all times so that any passerby can
 23 look inside. Unwilling to exercise the power to close the curtains to the public, including 3taps,
 24 craigslist instead in effect polices the *public* sidewalk, which it certainly does not have the power to
 25 do under any law, including the CFAA.¹² *See Pulte Homes*, 648 F.3d at 304. Any contrary view of

26 ¹² Although the "open window" metaphor is one way to conceptualize publicly available websites
 27 on the Internet as a physical "place," any cyberspace-as-a-place metaphor, including this one, is too
 28 restrictive because the way in which computers communicate when gathering information on a
 publicly available website cannot be analogized to space. When a user clicks on a link, the user's
 (cont'd)

1 “authorized” access to public websites would create a particularly dangerous “public” Internet
 2 environment policed by private website owners. A website owner could selectively “de-
 3 authorize”—backed by threatened criminal exposure—any person it did not wish to permit to view
 4 its public website. Such a permission-based regime for public websites could implode the basic
 5 functioning of the Internet itself, which is premised on the freedom of public search. Moreover, as
 6 a vehicle for targeting *who* may visit public websites, craigslist’s permission-based view of
 7 authorization under the CFAA also raises serious First Amendment implications—e.g., private
 8 companies could use the CFAA to deter or limit free speech and assembly.¹³ This certainly is not a
 9 policy *Nosal* or any other court encourages.¹⁴

10

11 (cont’d from previous page)
 12 computer sends a request to the server on which the desired information resides. *See* Mark A.
 13 Lemley, *Place and Cyberspace*, 91 Cal. L. Rev. 521, 523-24, 529 (2003). “That computer decides
 14 whether or not to respond favorably to the query. It honors the request by sending a copy of the
 15 document to the user’s computer” *See* Maureen A. O’Rourke, *Property Rights and
 16 Competition on the Internet: In Search of an Appropriate Analogy*, 16 Berkeley Tech. L. J. 561,
 568-69 (2001). Thus, analyzing this case, or similar cases, under an auspice that cyberspace is
 17 similar to a physical place will inevitably lead to unwanted legal implications, including
 18 inaccurately “creating [laws] of stunning breadth.” Lemley, 91 Cal. L. Rev. at 529. Therefore, for
 19 publicly available websites, there is truly no “access,” just two computers communicating. Thus,
 20 for public data on public websites, there can be no unauthorized access at all.

21 ¹³ If, for example, an owner of a publicly available news website sent cease-and-desist letters
 22 ordering a group of people who were critical of a journalist’s article to stop using its website, and
 23 the group continued to criticize the author of the article on the website, those speakers could be
 24 subject to criminal liability under craigslist’s interpretation of the CFAA. In this sense, where a
 25 vague statute “‘abut(s) upon sensitive areas of basic First Amendment freedoms,’ it ‘operates to
 26 inhibit the exercise of (those) freedoms.’” *See Grayned v. City of Rockford*, 408 U.S. 104, 108-09
 27 (1972) (citations omitted). Under even a more relaxed content-neutral standard, such a restriction
 28 must be shown to serve an important state interest, and the “incidental restriction on alleged First
 Amendment freedoms [must be] no greater than is essential to the furtherance of that interest.”
United States v. O’Brien, 391 U.S. 367, 377 (1968). Under this example, the CFAA would
 prohibit the group’s ability to speak, and to use the website’s comment board as a place to
 assemble. Because the news media’s conduct “is not constitutionally entitled to protection,”
 applying the CFAA broadly to such cases threatens to destabilize the balance struck by current
 First Amendment jurisprudence. *See* Christine D. Galbraith, *Access Denied: Improper Use of the
 Computer Fraud and Abuse Act to Control Information on Publicly Accessible Internet Websites*,
 63 Md. L. Rev. 320, 365 (2004).

29 ¹⁴ Enabling website owners to selectively deny access to publicly available websites is also
 30 bad policy from a competition perspective. As this Court itself observed, there is something
 31 troubling about imposing CFAA liability on a competitor accessing another competitor’s public
 32 website in violation of the website owner’s privately declared de-authorization of access (by cease-
 33 and-desist letter or otherwise). (Apr. 30 Order at 8 n.8.) As 3taps and Padmapper have alleged,
 34 such conduct by a competing website owner is overtly anticompetitive absent a legitimate concern

(cont’d)

CONCLUSION

For the foregoing reasons, 3taps respectfully requests that the Court dismiss craigslist's CFAA and § 502 claims alleged in the First Amended Complaint.

DATED: June 7, 2013

regarding harm to its servers. *See* Galbraith, 63 Md. L. Rev. at 333 (“[I]t appears that these owners of publicly accessible websites may be less concerned with actual harm to their computer system and more interested in finding a way to protect themselves from increased competition.”). Indeed, this Court’s intuition highlights that craigslist’s primary, if not sole, criterion for sending out numerous (if not hundreds or more) cease-and-desist letters is the use that the targeted person or company makes of publicly accessible, user-generated posts. In essence, invocation of the CFAA is part of craigslist’s broader scheme to be to scare off potential innovators and competitors. *See* O’Rourke, 16 Berkeley Tech. L. J. at 607-08 (“The Internet may be one of the few, if not the only, contexts in which it may be a viable strategy for a monopolist to create a barrier to entry by controlling the flow of its own product and pricing information.”).
